2009

FIFTH
EDITION

FLAT HONING / PRECISION MACHINING

A third Flat Honing / Fine Grinding machine was added to our growing production line. These machines excel at high volume and close tolerance work.

ON-FLOOR INSPECTION

Quality control inspects parts at the machine to assure finishing accuracy and save job time.

Statistically consistent larger part finishing is available for a wide range of materials.

ENERGY SAVING IMPROVEMENTS

Mist collection and heat recovery systems provide lower operating costs and also improves worker productivity.

BUSINESS GROWTH & BUILDING EXPANSION

Our grinding facilities include a recent completion of a 12,800 sq. ft. addition, bringing our total up to 43,500 sq.ft.
